                       34
                                     cout<<"Dalam desimal ";
                       35
                       36
                                     pangkat=1/pangkat;
                            pangkat=1/pangkat;
              36
              37
                            cout<<x<<" pangkat "<<y<<" = "<<pangkat<<<endl;</pre>
              38
                 L }
              39
```

Membuat project dan membuat file "hit.h"

```
#include "hit.h"

main(){
    cout<<"Menghitung hasil X Pangkat Y\n";
    cout<<"====\n";
    For p;
    p.input();
    p.proses();
}</pre>
```

Membuat file "main.cpp"
